## **CLASSIC CHILL BACKBAR FRIDGES WITH SOLID DOORS**

### **General**

All steel construction for durability, the back bar refrigerators are available in 3 sizes to fit your needs.

### **Cabinet Construction**

The exteriors are covered in attractive black vinyl; the counter top is made with Type 304 Stainless Steel.

The interiors are made from Type 304 Stainless Steel and have an energy efficient LED lamp installed and come equipped with PVC coated shelves.

The entire unit is built using a high density polyurethane insulation that is foamed in place.

### **Doors**

The doors are equipped with locks for security.

The gasket is magnetized to provide easy removal for cleaning.

Self-closing doors equipped with the "stay open" feature when opened past 90 degrees.

### **Refrigeration**

Oversized, factory balanced refrigeration is designed to hold 33 to 38 degrees Fahrenheit.

The refrigeration system uses R134A that is CFC and HCFC free.

Condenser unit is easily accessible for routine cleaning and maintenance.

### **Electrical**

Units come factory wired and ready to connect with 115/60/1 phase, 15 amp dedicated plug and cord.
