Plumbing requirements: cold water copper line with vacuum breaker at 24" above countertop height with 1/2" female end connection (or otherwise according to code). Indirect drainage must be provided within 3' of machine location, and 2 1/2" hole must be provided in counter top under machine as indicated in attached link. Space must be provided under countertop for pump/motor (12" x 12" x 12"), and space for filtration on wall or under counter (28"wide x 30"tall x 10" deep). Installer will mount filtration on drywall or wood only; all other surfaces require contractor to mount (brick/masonry, plaster/lath, stainless steel or tile etc).

NEMA L6-30R twist lock receptacle within 3' of installation location, fed from a 30 Amp, 2 pole 220V breaker. Receptacle is 3-wire single phase 200V, 2 hots, 1 ground. Receptacle can be above or below countertop.
